

ADMIRE. INSPIRE. CREATE.

When it comes to first impressions, brick and stone provide the most striking and sophisticated feature. Whether you're planning to add a simple and elegant accent or building a new stunning, quality home, we can make sure your project is a success. Our vast selection of styles, colors and materials can be artfully combined to create a truly one-of-a-kind home.

*F*or over 30 years, Belden Brick and Supply Company has been a leader in providing quality masonry, hardscape, and hearth products. As part of the Belden Brick family, we offer a unique advantage in experience and service as we gain knowledge firsthand from our 125 year old family company.

The product lines Belden Brick & Supply offer are expansive from clay brick and pavers, natural stone, concrete based material, high end stoves and fireplaces, along with installation supplies. Our showrooms, both in and out, offer a one-of-a-kind display of inspiration for your project needs. Our garden display of pavers and wall systems feature many ideas that can spruce up your plans. We also showcase our brick, stone, and concrete based materials so you can interact with the variety of textures and colors offered. Visit our indoor showroom and you will certainly warm up to our gorgeous setting of fireplaces and stoves. Our partnership with quality masons, hardscapers, and hearth installers and our experienced sales staff can give you the confidence you need to tackle your home and commercial project.

In 2009, Belden Brick and Supply expanded their business by opening a facility, Tri City Masonry Supply, servicing the Saginaw, Midland, Bay City, Mt. Pleasant, and Flint area. For more information visit our website at www.BeldenBrickandSupply.com or call our Grand Rapids office, 616.459.8367 or Tri City location, 989.573.8171.

WARMTH. BEAUTY. STRENGTH.

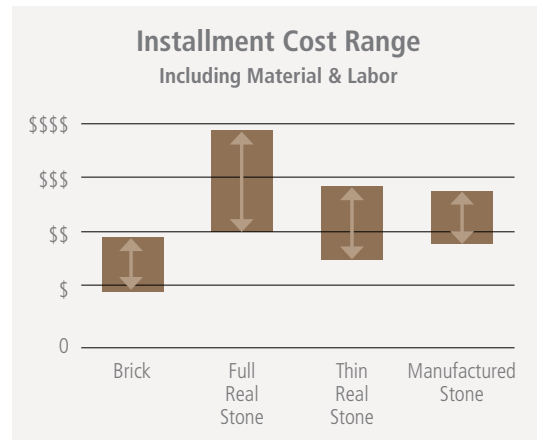

For Your Greatest Investment.

STRENGTHEN YOUR HOME INVESTMENT.

Brick, Real Stone, and Manufactured Stone are available in a wide selection of shapes, textures and colors.

It is a misconception that real stone and brick are more expensive than other premium sidings such as cement board, wood or stucco. Brick actually costs less and provides greater long-term benefits and cost savings, which means greater value for the biggest investment most people ever make.

- ▶ Brick is the structure of your home, not simply a siding! It is strength, durability, and physical protection for your family.
- ▶ Brick is classic warmth and beauty.
- ▶ Brick defeats fire, weather, time and design trends, never going out of style.
- ▶ Brick's natural beauty adds 9.52% more appraisal value than vinyl siding according to Marshall & Swift Residential Cost Handbook (2001).
- ▶ When selling your brick home, the ad always mentions it as a selling advantage.
- ▶ Brick never needs to be painted and never rots, fades, warps, burns, dents, tears or becomes brittle.
- ▶ Brick homes have an average energy savings of 8% per year. (www.gobricksoutheast.com)

Belden Brick and Supply has many samples and images for you to compare as you make your selection. We can easily inspire a combination that meets your budget goals and gives you the look and feel you're looking for plus make your home project enjoyable!

WATER AND MOLD RESISTANCE

ENVIRONMENTAL EFFICIENCY

COLOR AND STYLE

VALUE

APPLICATION

DURABILITY

MAINTENANCE

Unlimited colors, styles and shapes.
Natural color all the way through.
Full veneer, modular unit allows unlimited creative design options at the least cost.
Timeless, always in style.

The beauty of brick and stone and the durability of full masonry appreciates faster and makes you more money at resale.*

Material supports its own weight and is its own structure, supported off the foundation ledge.

Looks better with age and lasts for centuries, long after your mortgage is paid. (Historical landmarks)
Full bed thickness is the pinnacle of durability, providing the ultimate in fire, wind and pest resistance.
Never rots, fades, warps, burns, dents, tears or becomes brittle.

Virtually maintenance free.

Thickness is first barrier to water.
Properly constructed cavity wall provides ideal water resistance against mold, rot and mildew.

Made of the most abundant material on earth – clay and shale.
Thermal mass saves money on insurance, heating and cooling.

Variety of colors, styles and shapes.
Natural stone color all the way through.
Full veneer unit allows endless possibilities of creative design.
Timeless, always in style.
